

Response Radiance

Ceiling Mounted Header Box Fan c/w Heat Lamp & LEDs

What does it do?

The Response Radiance is part of the Rapid Response range which exhausts steam, odours & fumes from bathroom & laundry spaces with a built-in backdraft damper (see “accessories”). This particular model is c/w a grille with in-built Heat Globes & LED Lights.

Why is it important?

Exhaust of damp air filled with warmth & moisture from a bathroom or laundry space, mitigates the growth of mould and or introduction of damp odours to the rest of a home.

How does it work?

The Rapid Response Range are ceiling mounted exhaust fans which are ducted through a direct line to atmosphere. This is achieved via a External Wall Mounted Grille or EziFit Thru Roof Relief Vent (see “accessories”). Can be used in conjunction with an electrical Run-On-Timer (see “accessories”).

Power Usage

The Response Radiance’s individual components use very little energy and is required ONLY as the space is used.
Average Energy Consumption: <1.5kW/ day
Average Energy Cost: <50c/ day
